

Manuscript preparation for STEEL GRIPS - Journal of Steel and Related Materials

Please use the SGmanu.doc Word file to write your manuscript. It can be downloaded from www.steel-grips.com, STEEL GRIPS. Please note that this file is protected by copyright and may therefore only be used for manuscripts to be submitted to STEEL GRIPS!

Submittance

Please submit your manuscript:

a) electronically to:

- e-mail : editor@steel-grips.com

b) or, if the files are very big, please upload them to the STEEL GRIPS WebFileserver:

access www.steel-grips.com, click "Scientific Toolbox", click "WebFilemanager upload files to GRIPS", fill in the required information and proceed as indicated.

As soon as your files are uploaded, an automatic mail is sent to inform the editorial office about your upload.

Some explanation how to use the template

First of all, let us please state that this template is meant to support authors in writing their manuscripts. We do *not* want to increase your workload! So, if you have any questions or proposals how we can improve this support to make your work more easy, please do not hesitate to contact us.

1) File name of the manuscript

a) text file

Please use the family name of one of the authors as file name. Should you submit more than one contribution, either use the names of different authors or number them consecutively (e.g.: Miller1.doc, Miller2.doc...)

b) figure files

Please store each figure as a separate file (details about figure formats see below) putting Fig1, Fig2 etc. behind the authors name (e.g.: MillerFig1.tif, MillerFig2.tif...)

Please note: Figures should not be included with this Word-document!

Please submit them as separate files (see below "Figures")

2) Manuscript text (words in italics denote the resp. template)

Please start with the full names of all *authors*, *title* of your contribution and add an *abstract* of about 10 - 20 lines.

Please extract some 5 - 10 representative *keywords* from the abstract and put them below the line.

Fill in the author's note (*authorfeet*) characterising each author by his academic degree, full name, professional degree/position, Department, Company/University, town/country. Please attach a figure of each author. It has proven successful to include these author photos because thus

people (who have, so far, only be in e-mail or phone contact) can more easily recognize each other when they are going to meet at conferences.

Then please start with the manuscript text (*bdy*). Please make sure to use SI units only! In writing your contribution, please do not forget to clearly structure the text by section headlines.

Section headlines (*header1*)

A clear structuring of the text by means of section headlines is of prime importance for the understanding of the article.

If you need substructuring, please use

bdy + bold for the first sublevel

bdy + italic for the second sublevel.

Furthermore, words can be set in *italics* where they need to have prominence within a paragraph.

Example for a manuscript structure:

Aims and scope

please shortly describe the current situation; what was the reason for carrying out the investigations you are going to report on? What results do you expect from the tests?

Experimental

which testing apparatus have you employed? Describe testing procedure and give all the testing parameters, especially those which have been varied.

Evaluation of the results

which are the new findings? How can their occurrence be explained?

Discussion of results

comparison with other data; rating as far as existing international literature is concerned.

Conclusions

did the results obtained come up to your expectations? Which conclusions can be drawn? Outlook on possible further investigation or application.

Special templates

Please use *list* if you want to place a listing such as, e.g.:

⇒ Aims and scope

⇒ Testing

⇒ Evaluation of the results

⇒ Discussion of results

⇒ Conclusions

In writing *equations*, please use the Formulaeditor

$$e = mc^2 \quad (1)$$

Consecutive numbering of equations is highly appreciated. Use format equation.

Please cite references in accordance with the following examples. For journals, see [1], for books use [2], for conference contributions/proceedings use [3], a thesis should be cited like the example in [4] and a standard according to [5]:

References

- [1] Author I (Initial(s) + name), Author II (Initial(s) + name), etc.: title of journal Volume (year) No. ?, p. ???/??.
- [2] Author I (Initial(s) + name), Author II (Initial(s) + name), etc.: title of a book, no. of edition, publishing company, town, datum.
- [3] Author I (Initial(s) + name), Author II (Initial(s) + name), etc.: title of contribution, Proc. ? Intern. Conf. on ???, datum, town, Vol. ??, p.???/??.
- [4] Author I (Initial(s) + name), Author II (Initial(s) + name), etc.: full title, town, year (Dr.-Ing./rer.nat.-Diss./thesis).
- [5] No. of standard or patent: full title, datum of edition.

Then please add figure captions and choose template figure:

Fig. 1: text of caption

Fig. 2: text of caption

followed by tables (format table) introduced by the resp. table caption (tabheader):

Table 1: text of table caption

Table	table	table
1 line	2 column	3 column
2 line	2 column	3 column

Figures

To ensure a high-quality reproduction we kindly ask you to submit the figures as separate files, one for each figure.

Diagrams should be submitted in *.tif format, microstructure photos can also be submitted in this format or as *.jpg files (with *.jpg-files, please make sure that these are stored without any compression). Please note that a resolution of 300 dpi must be ensured with a figure width of 110 mm, as should a lettering size of 2 mm.

In exceptional cases, Powerpoint presentations may be accepted.

Please do NOT send figures as Word-documents, the resolution would be too poor for printing.

Manuscript length

Normally, maximum manuscript length is 6 printed pages. You may estimate the length of your manuscript as follows:

(number of text columns : 2) + (number of figures : 7) = number of printed pages

Kindly note: you are *not* supposed to submit camera-ready pages, in other words, you need not do any layout work. So, please don't try to get 2 text columns on one page, but submit the manuscript with only 1 text column per page as automatically created with the SGmanu.doc file!

Support

Should you need further support or in case there are any questions left, please do not hesitate to contact

GRIPS media GmbH / GRIPS Editorial Office
